

CPTC CAREER PATHWAYS Computer Networking & Information Systems Security

Career Cluster:

CAREER OPPORTUNITIES

Computer Networking & Information Systems Security

Prepares students for careers involving the protection of information on computers and networks against unauthorized access or modification of information, and against the denial of service to authorized users.

Includes those security measures, both physical and virtual, necessary to detect, document, and counter such threats. Curriculum content includes basic and advanced computer and networking skills, physical and virtual security processes and procedures, and introduction to security management, planning, and recovery.
