

EVCC CAREER PATHWAYS Medical Assistant - Certificate

Career Cluster:

MEDICAL ASSISTANT - CERTIFICATE - ATA

EvCC offers a nationally accredited [Medical Assistant Certificate Program](#). Our program has attained accreditation from the Commission on Accreditation of Allied Health Education Programs in cooperation with the American Association of Medical Assistants. Upon successful completion of an accredited Medical Assistant certificate program the graduate is eligible to write for national certification. Although there is no licensing for Medical Assistants, employers prefer to hire certified workers who have passed the national examination indicating that the Medical Assistant meets defined standards of competence.

Medical Assistants are health professionals specifically trained to work in settings such as physicians' offices, clinics, group practices, and other health care facilities. These multi-skilled personnel are trained to perform administrative and clinical procedures under the supervision of health care providers.

EVCC ADMISSIONS OPTIONS

Students who have earned a high school diploma or GED or students over the age of 18 may apply to Everett Community College online. Alternative options are listed below. Remember,

CAREER AND EMPLOYMENT OPTIONS

Medical Assistants are multi-skilled health professionals specifically educated to work in ambulatory settings performing administrative and clinical duties. The practice of medical assisting directly influences the public's health and well-being and requires mastery of a complex body of knowledge and specialized skills requiring both formal education and practical experience. They work in many types of ambulatory care settings, including physicians' offices, clinics, and laboratories. Medical Assistants' duties vary from office to office. In small practices, they are "generalists," handling both administrative and clinical duties. In larger practices, they tend to specialize within a wide range of areas from clinical to administrative.
