DIGITAL ILLUSTRATION CERTIFICATE

Computer or Digital Illustration is the use of digital tools to produce images under the direct manipulation of the artist, usually through a device such as a tablet or mouse. It is distinguished from computer-*generated* art, which is produced by a computer using mathematical models created by the artist. Our digital illustration courses explore many different artistic and technical techniques, equipment and software used in the creation of digital artwork. These include working with scanners, printers and digital drawing tablets, as well as software like Adobe Photoshop, Adobe Illustrator and Corel Painter.

The Digital Illustration Certificate is composed of courses that teach illustration skills throughout many different mediums.

CAREER & TECHNICAL EDUCATION OPPORTUNITIES

Courses are connected to and articulated with high schools via Tech Prep credit. Click below on your school district to locate a list of articulated class options.

ENDORSEMENT

Digital Illustration Endorsement (15-18 credits).

Endorsements represent the first steps of the Certificate and Degree programs. If you are interested in this endorsement, we suggest you contact the Program Advisor, Greg Kammer.

The endorsement is a small group of courses that concentrates on one specific skill within the design field. The Digital Illustration endorsement includes Digital Illustration I, II and III. This series of classes explores the different techniques, equipment and software used to create different types of illustrations and artwork on the computer.
